Metropolis® Pearls

Duralloy® Metropolis® Pearls deliver a vibrant, animated effect, ideal for use as a trim colour to enhance the total colour scheme. Duralloy® Metropolis® Pearls have been carefully chosen for their X factor, that special quality that allows this range of pearls to blend in harmony with a wide range of solid colours, turning standard architectural devices into features.

The precious range of pearlescent colours were designed to offer an alternative to anodising. Metropolis® and Precious® Pearls attract the Dulux® Duralloy® Warranty.

colour hints

Decorating is full of personal choices and preferences, so there are really no hard and fast rules. However, our colour experience has provided some guidelines which are useful in most situations.

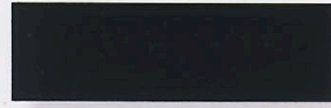

- Always have a reason for selecting a colour
- Choose textiles, fabrics and other furnishings before you paint your colours
- Background colours should not be intrusive. Their role is to enhance what is in the foreground.
- A common colour in connecting rooms, even if only in furnishings or woodwork, creates a good impression.
- One colour should always dominate a scheme - the colour of the largest area.
- Cool colours recede and increase the apparent size of a room. Warm colours advance to decrease the size of a room.
- Avoid using two colours of the same strength together.
- Every room should have some focal point, or point of interest. It can be anything from an accent colour or feature wall to a piece of furniture or art work.
- Where practical, use warm colours in rooms with a cool, southerly aspect and cooler colours in rooms that receive ample sunlight.
- Darker colours work well for smaller areas such as architraves, skirtings and trim details.
- Strong accent colours are powerful tools. Even accents of red and black enhance many schemes.
